

# Ankita Junagade

## OBJECTIVE:

Seeking a challenging role where I can leverage my 14+ years of industry experience, including 6 years of project management experience, to drive successful project deliveries and contribute to organizational growth.

## PROFILE:

A dynamic professional with adept in Agile, Waterfall, and hybrid project management methodologies, with proven expertise in cross-functional stakeholder collaboration, risk management, KPI reporting, and governance frameworks. I Possess deep technical understanding and proven ability to manage complex and highly technical development projects. Skilled in conveying messages effectively and customizing communication to diverse audiences.

I have mostly worked in IOT domain for condition monitoring of motors and drives .

## EDUCATION:

**Bachelor of Electrical Engineering - University of Pune -First class with Distinction**

## CONTACT:

10, Damodar Nagar,  
Old Sai-kheda Road, Jail road, Nashik, India  
Phone: +91 84518 58666  
Email: ankitajunagade@gmail.com  
Date of Birth: 23 July 1987

## EMPLOYMENT HISTORY:

### ABB,

**AI ML and Analytics Project Manager: February 2024-present**

#### Projects:

- Anomaly detection for Motors (Gated project)**
- Anomaly detection for Drives (Gated project)**
- Motor Analytics lean KPI development**
  - Managed backlog, refined user stories, and prioritized tasks to meet project objectives.
  - Drew the road map.
  - Ran the stage gate process for new technology projects Especially for
  - Implemented strategy for data gathering and data labeling.
  - Gave updates to stakeholders (product management and technology management) regarding progress of the project.
  - Conducted all the scrum ceremonies including planning
  - Supported customer support team
  - Prioritized backlogs
  - Participated in competitor analysis.
  - Generating insights from data bricks and Power BI
  - Co-ordinated with multiple teams including Platform team firmware team hardware team

- Established Model validation procedure using customer feedback
- Defined and accepted UAT

**Firmware Development for smart sensor: July 2023 to February 2024**

- Took over project management of Firmware development project for Gen 2 Sensor.
- Managed resource allocation effectively to ensure project deliverables were met.
- Conducted daily scrum meetings to keep the team aligned with project goals.
- Ensured delivery management and timelines were adhered to throughout the project lifecycle.
- Managed backlog, refined user stories, and prioritized tasks to meet project objectives.

**R&D team Manager and Product owner, 2020 Feb– Dec 2023**

- Led a team of 10 engineers in developing AI-based algorithms for sensor analytics projects.
- Acted as a stakeholder for sub-projects, focusing on data handling and storage solutions.
- Collaborated with stakeholders to gather requirements, define features, and prioritize user stories.
- Managed project budgets , conducted risk analysis, and developed mitigation strategies.
- Facilitated daily standups, performed capacity planning, and ensured project quality.
- Managed R&D lab activities and contracted vendors to meet supply needs.
- Contributed to ABB's Global Motion support team and participated in ISO 9001 audits.

**Sr Technical Consultant, 2016 Apr – 2020 Feb**

- Interacted with service units and customers to develop customer-friendly reports.
- Developed algorithms for determining motor health and participated in data science projects.
- Provided technical mentorship, managed operations, and coordinated service orders.

**Data Analyst- Motors and Generators, 2012 Dec – 2016 Apr**

- Conducted data analysis for condition monitoring of motors and generators.
- Improved physics-based models for calculating Remaining Useful Life (RUL).
- Conducted PDCA and performed various types of motor insulation analysis.

**FOX CONTROLS, NASHIK, 2011 April - 2012 December**

#### Project Executive:

- Involved in Scada development for various projects.

**RATNDEEP MARKETING, 2010 July - 2011 April**

#### Graduate Engineer Trainee:

- Involved in LED street light development project.

## SKILLS:

### Project Management

- Strong background in project management
- Ability to manage multiple projects simultaneously.

### Project management Methodologies:

Agile, Waterfall, Hybrid (including Stage-Gate + Agile)

### Consulting

- Experience in consulting.

### Cross-Group Collaboration

- Strong background in cross-group collaboration

### Agile Methodologies

- Proficient in Agile project management methodologies

### Hybrid Project Management Methodologies

- Proficient in hybrid project management methodologies

### Analytics and Data Science

- Deep understanding of technology of Analytics and Data Science

### Technical Problem-Solving

- Ability to address technical challenges.

### Communication Skills

- Excellent verbal written communication skills

### IP Strategy

- Knowledge and experience in IP strategy

### Signal processing.

- Knowledge of signal processing concepts

### Statistical algorithms

- Established processes for statistical algorithms development testing and verification.
- Possess knowledge of concepts of statistics and probability

### Model Validation and evaluation

- Established processes for AI and ML model validation using real labels from customers.
- Responsible for model deployments

### Power BI

- Used for generating data insights.

### Databricks

- Used data bricks for gathering specific data and generating insights for decision making

### IOT Architecture

- Understanding of general IOT architecture within the organization
- Helps in prioritization of stories and general management.

### Big data Analytics

- Understand the basic concepts of Big data analytics.

## CERTIFICATIONS:

Certified Scrum Master - Scrum Alliance

## ACHIEVEMENTS:

- Star performer Extra miler award for improving project management processes with ABB and mentoring new managers.
- Received "High performance team" award within "ABB Smart Solutions" business.
- Spot award for successfully managing the 'Algorithm Project'.
- Recognized for deploying new designs of LEAP service reports globally.
- Nominated as the best debutante in Fox Controls.

**HOBBIES AND INTERESTS:** Human psychology, Teaching, career coaching and mentoring, listening to music and a big movie buff.
